Brian Malloy, PhD

October 19, 2016

Office: 313 McAdams Hall	Internet: www.brianmalloy.com
Office Hours: by appointment	e-mail: malloy@clemson.edu

1. The textbook for the course is *Flex & Bison: Text Processing Tools*, by John Levine. Also, I will post materials at www.brianmalloy.com and in the repository for the course.
2. Tentative Grading Policy ($\pm 10\%$):

Two Exams	40%
Programming Projects	45%
Quizzes	5%
Final Exam	10%

3. *Electronic Devices*: You may not use laptops or other electronic devices during lecture.
4. *Grading*: Any questions about grading must be submitted in writing, and placed under the door of my office within 72 hours of the day that the graded material is returned to the class. The instructor reserves the right to re-grade your entire exam.
5. *Behavior*: Do not engage in side conversations during lecture; direct your questions and comments to all of us because we're all interested in learning more about compiler construction. If you suspect that your question is too basic or ignorant for general consumption, ask your neighbor or myself after lecture, not during.
6. *Attendance*: Your attendance at lecture implies that you are prepared to listen attentively and to participate in any discussion that might occur.
7. *Policy and Syllabus*: Policy & syllabus can be found on my web page. www.brianmalloy.com
8. *Venue*: The course meets in Lahotsky Hall 138, on Tue & Thu, from 2:00 until 3:15. If the instructor has not arrived by 2:15, you may leave.
9. *Programming Projects*: There will be approximately five to ten programming projects, and these will be written in C^{++} or Python. They must all be submitted as a compressed directory, including an ASCII README file that begins with the provided README template, and is then modified to accomodate the specific project and student.
10. *Grades*: The grading scale is: 90 or better is an A, 80 or better is a B.
